Flying Colours: Core Aggressive

Portfolio Date: 31/10/2026

The Flying Colours Core Aggressive model portfolio aims to maximise returns, however large short-term volatility should be expected and there is the possibility of longer term losses. It is invested mainly in equities (typically 90-95%), with the balance invested into cash and fixed interest securities. Alongside a core holding of passive or index-tracking funds that helps keep costs to a minimum, the portfolio may at times include carefully selected investments designed to improve returns. The Core portfolio range could be the ideal choice for investors interested in a simple and cost-effective investment portfolio.

Notes on Fund Charges

The costs shown in the table above are charged by the fund management companies that manage the funds. All investors in the funds will pay these charges. Flying Colours receives no income or rebates on these charges. Further detail on each of the charges follows.

Estimated Ongoing Cost
All funds quote a KIID Ongoing Charge, and this charge is normally shown on fund factsheets. Some funds incur extra costs in the day to day management of their funds. However, generally funds don't publish these additional costs. For transparency, we publish what is called the Estimated Ongoing Cost, which is the normal KIID Ongoing Charge plus these other "hidden" charges.

For most of the funds we invest into, the ongoing cost is the same as the KIID Ongoing Charge. For the portfolio as a whole, the Estimated Ongoing Cost typically works out between 0.0% - 0.02% higher than the KIID Ongoing Charge. So the effect is small, but we believe it is important our investors understand how the fund managers charge.
