

Flying Colours: ESG Growth Plus

Portfolio Date: 31/10/2024

The Flying Colours ESG Growth Plus model portfolio is designed for investors who want to take a sustainable approach to investing and aims to achieve high levels of growth and investors should expect some short-term volatility. It invests primarily in equities (typically 85%), selected under ESG criteria, with the balance invested into cash and fixed interest securities. The portfolio aims to achieve a good overall return, however short-term volatility should be expected.

Performance Data

The Flying Colours ESG model portfolios were launched to the market on 1st July 2023. Performance data before this date is taken from our internal records using the appropriate IA Benchmark prior to 1st April 2020, and a simulated portfolio thereafter. Portfolio performance figures are calculated net of the underlying fund charges, however, do not include the discretionary management fees. The performance comparison does not take into account platform or ongoing adviser charges which may vary from client to client. Actual returns may vary. All figures are sourced from Morningstar Direct.

Notes on Fund Charges

The costs shown in the table above are charged by the fund management companies that manage the funds. All investors in the funds will pay these charges. Flying Colours receives no income or rebates on these charges. Further detail on each of the charges follows.

Estimated Ongoing Cost

All funds quote a KIID Ongoing Charge, and this charge is normally shown on fund factsheets. Some funds incur extra costs in the day to day management of their funds. However, generally funds don't publish these additional costs. For transparency, we publish what is called the Estimated Ongoing Cost, which is the normal KIID Ongoing Charge plus these other "hidden" charges.

For most of the funds we invest into, the ongoing cost is the same as the KIID Ongoing Charge. For the portfolio as a whole, the Estimated Ongoing Cost typically works out between 0.0% - 0.02% higher than the KIID Ongoing Charge. So the effect is small, but we believe it is important our investors understand how the fund managers charge.

Estimated Transaction Costs

This is another set of charges incurred by the funds, and it shows what the impact of transaction costs is on each fund's unit price. There are many different ways that funds can calculate this figure and, confusingly, some calculation methods can lead to a negative charge (i.e. transaction costs add value to the fund). Only the fund management companies know the detail behind the transaction costs calculations, and we publish the figures submitted by them.
