

Flying Colours: Core Growth Plus

Portfolio Date: 31/03/2024

The Flying Colours Core Growth Plus model portfolio is invested primarily in equities (typically 85%), with the balance invested into cash and fixed interest securities. The portfolio aims to achieve a good overall return, however short term volatility should be expected. Alongside a core holding of passive or index-tracking funds that helps keep costs to a minimum, the portfolio may at times include carefully selected investments designed to improve returns. The Core portfolio range could be the ideal choice for investors interested in a simple and cost-effective investment portfolio.

Performance Data

The Flying Colours Core Growth Plus model portfolio was launched to investors on 1st July 2021. Performance data before this date is simulated, and is calculated by assuming this model was made up of the average holdings of the Flying Colours Core Growth and Flying Colours Core Aggressive model portfolios. Portfolio performance figures are calculated net of the underlying fund charges, however, do not include the discretionary management fees. The performance comparison does not take into account platform or ongoing adviser charges which may vary from client to client. Actual returns may vary. All figures are sourced from Morningstar Direct.

Important Information

The value of an investment, and any income from it, can fall as well as rise. Investors may not get back the full amount they invest. Past performance is not a reliable indicator of future results. Flying Colours Investment Management Limited is authorised and regulated by the Financial Conduct Authority under number 922882. We are registered in England and Wales under company number 12433663 at 1301 Ocean House, The Ring, Bracknell, Berkshire RG12 1AX.

Notes on Fund Charges

The costs shown in the table above are charged by the fund management companies that manage the funds. All investors in the funds will pay these charges. Flying Colours receives no income or rebates on these charges. Further detail on each of the charges follows.

Estimated Ongoing Cost

All funds quote a KIID Ongoing Charge, and this charge is normally shown on fund factsheets. Some funds incur extra costs in the day to day management of their funds. However, generally funds don't publish these additional costs. For transparency, we publish what is called the Estimated Ongoing Cost, which is the normal KIID Ongoing Charge plus these other "hidden" charges.

For most of the funds we invest into, the ongoing cost is the same as the KIID Ongoing Charge. For the portfolio as a whole, the Estimated Ongoing Cost typically works out between 0.0% - 0.02% higher than the KIID Ongoing Charge. So the effect is small, but we believe it is important our investors understand how the fund managers charge.

Estimated Transaction Costs

This is another set of charges incurred by the funds, and it shows what the impact of transaction costs is on each fund's unit price. There are many different ways that funds can calculate this figure and, confusingly, some calculation methods can lead to a negative charge (i.e. transaction costs add value to the fund). Only the fund management companies know the detail behind the transaction costs calculations, and we publish the figures submitted by them.
